Integrity. Dignity. Community.

Three simple words that ring like bells.

**Robert W Malone MD, MS**

In March of 1963, a great man came to Washington, stood on the steps of the Lincoln Memorial, and changed the world by speaking from his heart about his dream. Simple words that continue to resonate through time.

We all stand on the shoulders of giants. The simple truths are what matter most. Honest words, spoken from the heart, can change the world.

I am a physician and a scientist, highly trained and experienced in developing vaccines and other medicines, but I have also been a carpenter and a farm hand. In my life, my wife, my family, my friends and my treasured horses have provided all that I could hope for.

It has not been an easy life, and I have seen hard times. In walking my path, I have traveled from the arrogance and hubris of youth to arriving at awareness that peace and happiness flows like a fountain from a commitment to kindness, good works, and striving to help others.

I come to you with an open heart, as a physician committed to healing, bringing three simple words. Each of which ring like bells in the soul of honest people.

Integrity. Dignity. Community.

Integrity is a commitment to truth, in what you say, how you live, and how you treat others.

Dignity flows from respect, for ourselves, for each other, and for the world we live in.

Community is what binds us together, to each other, and gives our lives purpose and meaning.

Saint Augustine, the doctor of the Roman Catholic Church, famously said “The truth is like a Lion. You don’t have to defend it. Let it loose. It will defend itself.”

Harry Truman, a warrior against war profiteering, famously said “I just tell the truth, and they think it’s hell”.

These are my truths, and I believe that they are self-evident.

We should not have politicized the public health response to SARS-CoV-2 and COVID-19.

Regarding the genetic COVID vaccines, the science is settled.

They are not working, and they are not completely safe.

Now we have Omicron. These vaccines were designed for the Original Wuhan strain, a different virus. Whether they made sense for protecting our elderly and frail from the original virus is irrelevant. So let’s stop arguing about that. We must look forward.

These vaccines do not prevent Omicron infection, viral replication, or spread to others. In our daily lives, with our friends, with our families, we all know that this is true.

These genetic vaccines are leaky, have poor durability, and even if every man, woman, and child in the United States were vaccinated, these products cannot achieve herd immunity and stop COVID. They are not completely safe, and the full nature of the risks remain unknown. In contrast, the natural immunity which healthy immune systems develop after infection and

recovery from COVID is long lasting, broad, and highly protective from disease and death caused by this virus.

If there is risk, there must be choice.

This is the fundamental bedrock truth of modern bioethics.

All medical procedures, vaccines, and drugs have risks.

All of us have the right to understand those risks, and to decide for ourselves whether we willingly accept those risks.

To deny this is to deny human dignity.

Evil has many roots. A willingness to deny human dignity is one of the largest. In our hearts, and in our souls, we all know this is true.

Although I am a physician who is deeply committed to the Hippocratic oath, I am above all a husband, father, and grandfather. I ask that you allow me a moment to speak to you about our children, and about our fundamental responsibility to protect them.

If nothing else, we must nurture and protect our children. This is job one. It is your job. It is my job. It is not their job to protect us. And during the last two years, our society and our public health response has failed to protect them. Many things that our public health system has demanded we do to our children has directly harmed them.

Self-harm, suicide and drug abuse in children have taken off all around the world. Anxiety, bullying, intimidation, coercion have become the norm. Measured IQ in the very young has dropped. Fundamental childhood delays are easily measured. And physical damage to children from injecting them with genetic vaccines in order to protect the elderly from a virus is occurring.

As a parent, it is ultimately your responsibility to protect your children. If they are harmed by these genetic vaccines, you are the one that will have to take care of them. And you will carry that burden for the rest of your life and theirs. On average, between one in two thousand and one in three thousand children that receive these vaccines will be hospitalized in the short term with vaccine-caused damage. Only with the passage of time will we know what long term damage may occur. The vaccines do not protect our children from becoming infected with Omicron, and do not prevent infected children from infecting others. In contrast, the

pharmaceutical companies and the government are almost fully protected from any damages these products might cause to them. If your child is damaged by these vaccines, you will be left alone with both your grief and the burden of care.

These genetic vaccines can damage your children. They may damage their brain, their heart, their immune system, and their ability to have children in the future. And many of these types of damages cannot be repaired.

So I beg you, please, get informed about the possible risks that your children may be damaged by these experimental medical products. Don't let anyone tell you what to do. Think for yourself. Because it is your responsibility to protect and nurture them. If they are damaged, no state Governor, no federal public health official, no television doctor will be there to help you. You, your family and your child will have to carry the load yourselves.

~~~~~

Finally, I wish to leave you with hope. We will get through this. I sincerely believe that we can break through the effects of the madness of crowds, the Mass Formation, the effects of the legacy media and big-tech promoted fear and psychological manipulation which have deeply distorted public health policy. Omicron is destroying the approved narrative that the vaccines are safe and effective, and that early drug treatment does not work. The dark winter predicted by our president and pushed by fearmongers in the media is failing to materialize.

I recently returned with my wife Jill from a trip to Europe to work with and learn from Drs. Geert Vanden Bossche and Mattias Desmet. I was reminded once again by them, as I am reminded by all of you, that Americans are fundamentally good people. The world still believes in the American experiment in self-governance. The Davos oligarchs have demonstrated their gross incompetence to all the world over the last two years. They have neither right nor ability to govern America and Americans. We are a free people, and we have governed ourselves for almost 250 years now based on a constitution developed by self-reliant farmers, tradesmen, shop-owners, and landholders. These forefathers rejected a foreign monarchy and oligarchy and instead created and fought for a political structure which remains an inspiration for the world. A shining city on the hill. A Camelot.

When I was still a child, a brilliant young man said "Ask not what your country can do for you; ask what you can do for your country". This is our country. We own this amazing gift, but we must defend it if we wish to keep it. Today, I ask all of you to keep his words in your minds and hearts. We can all be leaders, and now is the time to step up to the task. We will survive this,

and we will overcome these hardships, if we can just keep these three simple words in our hearts.

**Integrity.**

**Dignity.**

**Community.**

What a beautifully, perfectly written essay for a Sunday morning. Thank you from the bottom of our hearts for expressing what we as Americans feel in our hearts also. Thank you for being a voice for us who believe in the goodness of people and our humanity. Those three words are a guide for living a good life. Thank you Dr. Malone!

What a wonderful thing to wake up and read this morning. It gives me hope for America and the world. I pray that God will bless all of you brave warriors that are out there trying to save humanity. These last two years have been the most scary and difficult. I never thought in all my

years that our government would abuse their citizens like our government has. But I believe all things happen for a reason and maybe this was what we needed to wake us from our slumber and fight for our rights as citizens. Sometimes you don't know what you have and until you lose it.
